**Step 4.** Fasten the Locking Bolt (G) to the small Nut (F).

**Step 5.** There are 3 ring adapters (H) that have been placed inside the umbrella stand tube (E). All three adapters must be pulled out to accommodate a larger size pole. The first two adapters are easy to pull out. The third adapter fits tight to the umbrella stand tube and may require more force to remove. Select a suitable adapter according to the size pole as shown in the list in Fig 2. When using the small ring adapter, the medium one and the larger one should be used with the small adapter. When using the medium ring adaptor, the large one should be used with the medium adapter.
